Dear Sir:

In the City of Corunna, in the Shiawassee River, there is a water dam where the old mill was back some years ago. Our understanding of this dam is that it is owned by a private individual whose name is Mr. Jack Wapner.

This dam is in desire need of repairs. Is there any control that the D.N.R. has over maintaining privately owned dams to control the water level of the river? If there is, how do we go about enforcing these regulations on this dam?

If this particular private owner will not maintain this dam, the City would be willing to assume the responsibility of this dam if it were properly deeded over to the City.

If there is any way that we can service this dam, we would like to do so for recreation and water use right here in the City of Corunna. Please reply to this office.

Cordially yours,

Thomas Lennox
City Manager
